## SPECIFICATIONS

The Polijet down draft table is a self contained unit that features sophisticated cartridge filters (as opposed to ordinary filter bags) which are capable of filtering particle sizes down to 0.2 microns. The filters used by the Polijet table are rated at 99.9% efficiency. The built-in pneumatic switch with manual control allows for easy cleaning of the unit with a jet of compressed air. The Polijet unit was designed to guarantee that all toxic fumes and harmful dust particles

are immediately captured at the source to ensure operator safety. Options for the Polijet unit include a side fixed wall without suction, a differential manometer, and a variety of

replacement filters. The Polijet down draft table is perfect for dust and fume extractor and can be used for a variety of applications including welding, soldering, and woodworking.

### WARRANTY & INDEMNITY

Dust Monkey warrants products it manufactures for a period of 90 days to the original purchaser from the date of purchase. Items not manufactured by Dust Monkey are limited to their own manufacturer's warranties. This warranty does not apply to defects due directly or indirectly to misuse, negligence, accidents, abuse, repairs, or alterations or lack of maintenance. This is Dust Monkey's sole written warranty and any and all warranties that may be implied by law, including any merchantability or fitness, for any particular purpose, are hereby limited to the duration of this written warranty. Dust Monkey does not warrant or represent that the merchandise complies with the provisions of any law or acts. In no event shall Dust Monkey liability under this warranty exceed the purchase price paid for the product. Both parties agree to binding arbitration in Las Vegas, Nevada. Dust Monkey shall in no event be liable for death, injuries to persons or property or for incidental, and contingent, special, or consequential damages arising from the use of our products. Dust Monkey warrants products only for the specific use expressly agreed to at time of purchase by Dust Monkey in writing. Motors should only be started and stopped up to 4 - 10 times per hour. Starting motors more frequently can cause heat build up and can cause the motor overload to trip or cause motor damage. In general, motors should be started and stopped as little as possible for maximum lifespan and best economy (electrical use). \*Note: Motors should be protected from extreme weather to prolong motor life. All claims, including claims covered under the limited warranty, are subject to inspection and investigation before Buyer's claim is settled. Any parts returned for warranty or repair will not be accepted without an RMA number and must be shipped pre-paid. Contact Customer Service with the original bill of sale to obtain an RMA number.
